

Landscape Waste Removal Services

The following is a summary of additional landscape waste collection/removal services that the licensed municipal solid waste haulers offer. Additional fees may be charged for this service. Many municipalities, and several unincorporated areas of the county, are served by designated waste haulers who have exclusive contracts to serve specific geographic areas. Residents who are unsure if they have a designated hauler should contact their municipality or the McHenry County Solid Waste Manager for further information. Residents who do not have a designated solid waste hauler may contact any municipal solid waste hauler licensed in McHenry County.

Please note that this list is provided as a convenience and the McHenry County Department of Health does not certify the capabilities or recommend any of the licensed municipal solid waste haulers on this list.
